

String Method:
A string is a collection of static methods or character arrays as defined by double quotes. These characters can be manipulated using the following 2 ways:

- By using **String Class** methods:
 - By using **char array** methods:
 - By using **Character array (2D character)**:
 - By using **Programs**:
 - Using a collection of other various character

and many more.

String s1 = "Java";

String s2 = "Java";

String s3 = "Java";

String s4 = "Java";

String s5 = "Java";

String s6 = "Java";

String s7 = "Java";

String s8 = "Java";
